

Sen 9/5 ~~4~~

Susanne Reid

Yesterday night she & I slept
for abt 1.30 hrs. She slept
from night after 4:00 up to
5:30. She was trying to get
out of her bed. I put her
back every time night after.
Then she was rolling on the
bed + fall out of the bed
right against the wall. I picked
her up + put her back to bed.
She was rolling out again, she hurted
herself a little bit. I picked her
up again + put her bed against
the wall. ~~What was going~~

I also tried to give her a
banana, she did not want
to eat.

LISA McANDERSON

20/11/95

12:16 pm

HOW MUCH HAS SHE SLEPT?

Looks like no sleep. Says goes for a nap, back up in 3 minutes.

When did she last eat? HOW MUCH?

Take a sip of water + spits it out.

Bite of apple, bite of banana, spat them out.

IS she taking vitamins? Specifics

No. won't take anything.

IS she taking Cal-Mag? How Much?

Few sips, maybe 1/2 glass, last night.

To: SNR C/S RSO ^{/RUSH/} 21 Nov 95.

From: Valerie Demange 12:00 PM.

Re: Report on Lisa Mc Pherson.

Dear Sir,

Lisa slept about 8 hours or more - I arrived on the watch at 1:00 AM and she was sleeping -

She has been waking up for some short period of time (like 15 seconds) and then falling asleep again - She was also talking a lot, mainly saying "Thank you" while sleeping. This morning at about 9:30 AM I got her to take 200 mg of B1, 1000 mg of C vit, 200 mg of potassium and 100 mg of B6 - I brought some cell mag but she refused to drink it - However she drank 2 glasses of water and had a large protein drink - Around 11:00 AM she was given some eggs and toast - She ate half a toast and 2 bites of Eggs - She was then pretty agitated for about an hour during which time she was talking a lot and crying - what she was saying usually

She was going to go somewhere
and then laying down on her
bed - She told me as well that she
has had bad ~~own~~ manners and this
resulted in bad consequences -
She also at some point asked me
if someone was behind the door -
I made her understand there was
nobody and she was fine -

This is all for now -

Re: Liza Mc Pherson

Dear Sir,

I was on the watch from 3H30 AM to 4:00 PM. From 3H30 AM to 10H00 AM she was very nervous and violent - During that time she did not sleep - She slept only from 10:00 AM to 2:00 PM, then waked up and has been awake since -

She has not been eating - just drinking a little bit of orange juice, then she threw the rest away - She also refused to eat the food that was brought to her, including the protein drink that she usually takes -

The rest of the time she is just talking, asking questions and answers, like if someone would be asking her questions and she would then answer -

Re: Lisa McPherson

I want to correct the data regarding what Lisa actually ate today.

Cold cuts were brought over - she was interested in them but would not chew or swallow. I had some Herbalife protein powder & made a shake for her. She would not drink this. There were several very ripe ^{bananas} ~~bananas~~ available to me, so I mashed one & put about a tablespoon of protein powder in it. She ate it very eagerly at first. I made a second batch which she was less interested in, even tried to hit away from her - I simply gave her a bite every few minutes and left her alone when she fought it.

She was lying down when I fed her. She tends to just hold things in her mouth or spit them out. I was making swallowing motions & rubbed my finger on her throat & she finally swallowed the first and next couple of bites I gave her. Then she was very in PT & interested in the rest.

Re: Lisa Mc Pherson

Dear Sir,

Around 7:00 PM yesterday night Lisa had a protein drink as well as a glass of water - we were also able to get her B vitamins. She also had herbs to help her sleep - This night she slept for 2 hours and half straight and later half an hour more - The rest of the time she talks and move on her bed or on the floor - She was violent for about 2 hours yesterday night, the rest of the time she was calmer and looks very tired -

Much love

Valerie Demange

FSO 00147

Report Wed night

om 8:30 to 12:30 → slept about 40 mins - called MCo to get
some instructions

12:30 Valeri + I gave her 2 valerian root capsules
2 of the little gel tablets + 2 white tablets with
about 3/4 cup of herb tea

1:00 - 1:30 I gave her ^{1/3 of} a banana shake with five more
of the small white tablets

2:00 - 3:00 She slept soundly. Dozed fitfully before
+ after this

4:00 Spoke with Dr. Johnson re: no real sleep

3:00 - 6:00 Gave her the rest of the banana shake
with the 5 white tablets + 2 more valerian root capsules

6:00 - 9:00 She slept soundly

There are some very ripe bananas in the
housekeeping room. I am going to get more valerian
root to her in some mashed banana. She really
likes banana.

Rita Bayken

Dear Sir,

30 NOV ? FRIDAY.

9 PM - 1 AM

Awake: On floor scooting around, moving

arms + legs + speaking + grunting
Had 4 ozs of a thick, rich protein shake from the Pavilion
1 AM Dr Johnson just visited. Not possible for ~~her~~ ~~to~~ ~~have~~
any more chloralhydrate. I need to get 4 more valarian
root capsules into her + a quart of fluid.
I am mixing up a medium of mashed banana, OJ +
some of her strawberry protein drink to mask the taste
of the valarian root

1:30 - 5:00 I probably got the equivalent of 3 Valarian
root caps into her. It took 4 feedings over a
4 1/2 hour period.

She will appear to be very cooperative - hold her
mouth open, make eye contact, act as if she is there,
then close the back of her throat + not swallow. Her voice
becomes nasal + she mutters rather than pronounces her
words properly. My idea of closing her nose so she has
to swallow so she can breathe through her mouth is
only marginally successful. She either swallows + breathes
or she lets everything in her mouth come out.
When she refuses to swallow + just spits
everything out I leave her alone + try again later.

She just dozed for minutes at a time. No
significant block of sleep.

8 AM Cleaning her + the room + getting her into clean
cloths. She has had 2 very small BMs in the past
24 hrs + has urinated 5 times.

I am going to give her more banana + finish her
shake + give her herb tea also.

7:15 AM I got a small amount of the banana + shake
mixture into her + about an ounce of tea.
She is much more physically strong this
AM. She sits up frequently + for long periods of
time. Whereas yesterday I only saw her sit up
once - she was lying on the floor scooting
around. She is using her legs to kick again.
Yesterday it wasn't much of a threat.

not help me feed Lisa. I couldn't have enough of
a comm cycle with her to get her to help so
I used the radio to call security & sent her out.
A security guard spoke with her & she came
back in. She sat in the corner & cried for
a while then helped me feed Lisa.

△ Rita Boykin

~~10:15~~ P.S.

9:45 Sylvia hasn't snapped out of it. She is
very down & very cold.

P.P.S. Lisa has come up some - she was apathetic
yesterday - physically & in her comm - just a
couple spurts of anger & not very determined at
that.

This AM she is deliberate & nasty - even
evil.

Friday day/evening

11^{AM} She's asleep! Dr Johnson was here & gave her 2 chloralhydrates. I believe she got the entire amount in each capsule.

2⁰⁰ She became very restless & almost awakened. I used 2 Chloralhydrates & got approx 1 in her. Then sat next to her breathing deeply & sung for about 1/2 hr to ~~ensure she~~ ^{get her to imitate the} ~~would sleep.~~ She kept starting a very fast shallow breathing that was part of her agitation & increasing it.

PM Still asleep. - Has been "put" back to sounder sleep by "sleepy breathing" but never completely awakened.

3³⁰ She awakened around 3³⁰ & I have not gotten her back to sleep yet. I gave her 4 Valium & Root Caps - she probably actually got 2 1/2 - 3 + 6 of the white tablets, giving her Cal Mag + OS at every ^{opportunity}. She is wide awake, on the floor, bouncing, humming & talking. I will be getting a couple of protein shakes for her shortly.

3⁰ Lisa slept for another hour & has been very quietly resting for another hour. I don't have ~~and~~ any more detail than this, as I was asleep also.

^{approx 12 02}
She had 1 protein shake today & approx 10oz of orange juice. Also about 2oz Cal Mag

Dear Sir,

Sat 2 Dec

1 AM - 3 AM I gave her 4 Valerian root capsules, 4 Orinthane (not positive of the name - haven't seen the bottle, but it is one of the herbal sleeping preparations) and approx 6 oz cal mag.

She has gotten drowsy from time to time but at 3 AM is still awake + talking.

We also cut her fingernails. This will reduce the risk of scratches to herself + us. She has scratches and abrasions all over her body + on elbow + knees has pressure sores. None of them are open + none of them look infected.

8 AM She slept for 2 hours - 1 hr at a time, being ~~awake~~ talking + basically immobile while awake.

I will give her more of the herbal sleep preparations + will be in comm with Janis later about other measures to ensure she gets some serious sleep today.

The finances for her protein drinks ran out last night. I was in comm a security guard who could be source of the money was Lisa's employer + he thought he could get more this morning.

I suggested we buy Vita Soy from the canteen + protein powder + yogurt + I make the shakes. This would make it go farther this time. I have a refrigerator in the housekeeping room next to Lisa's room.

10 AM I haven't given her the herbs as she has been sleeping, sometimes soundly but fitfully also. Next time she wakes up enough to start talking I'll give them to her.

12:00 Just finished giving her 2 Valerian root caps, 3 Orinthane tablets + abt 2oz cal Mag.

Sat 2 Dec

2 PM Appears to be awakening. She has tried to stand several times but is not strong enough yet. I am going to feed her some mashed banana + protein powder. Have been in comm @ Security re getting more money for her.

3 PM She just finished the banana, protein powder + 4 containers of half + half.

She is resting now. She originated that she knows we are trying to help her although she doesn't know our names and we don't talk to her. The rest of her comm is the usual confused stuff.

She also had a couple ozs of water.

Body wise she is very restful + gentle. She has tried to stand a couple of times but is not strong enough.

6⁰⁰ Has been laying on the bed sleeping + resting.

6³⁰ Fixing more banana + protein powder + half + half.

Saturday - see

7-8 PM Fed her another banana & protein powder half & half
Also got a protein shake & gave her about 2 oz +
1 oz Cal Mag + OS

1:00 She has been resting & dozing - talking from time
to time.

She feels the pain of the bruises on her
body and comments on it when she is moved
or bumps herself.

Also, was very lucid when being fed & commented
on the milkshake & that it was banana flavor

1:00-1:30 Tried to feed her again but wouldn't take
anything. She thought we were psychos or
other enemies who wanted to kill her.

Also tried more valerian root. She just
got whatever would be absorbed under the
tongue.

Sunday
10 AM

She slept most of the time - several hours
of really good deep sleep.

When she awakened this AM she was very
confused & combative & continues.

At 5 AM she got 2 moe chloralhydrate
& has slept very well since then.

11:30 She is almost fully awake. We are going to
feed her the rest of her protein shake & follow
it up with more valerian root, ointment & cal mag.

She has had a 6 oz cup of water through
the night the items above.

1:30 Had another 4 ozs of OS and cal mag. She had
about 2 1/2 hours of sound sleep - interspersed with

At one point it seemed she wanted a sweater
on. I put it on her & she thanked me.

to SNR CIS
from Med. Off. Manager

18-Nov-95

2:45 P.M.

She had 1 1/2 cup Cal Mag, small bite of Turkey
+ Spagetti, 3/4 banana:

Lisa is talking since about 30 minutes:

- "I created time ~~and now~~ 3 Billion years ago
and now I am dramatizing it since then."
- "I am LPH and I didn't confront it because
~~it~~ I didn't confront that power."
- "I can't confront force. I am dramatizing it."
- "I have an NU on the Student HAT."
- "I was 1-1. What my dramatic true level is."
- "I dissimilated my mother, but she didn't
get handled. As I didn't confront force."
- I ~~was~~ want to dance.

I need my auditor, Mr. Katusinski.
I need to confront my man.

3:15 P.M.

She is still talking, non stop.
She tried to go out of ~~the~~ the door.

- "I want to take the tooth brush and brush
the floor until I have a cognition"

She went to the bathroom and brushed her
teeth.

Rush

18-Nov-95

6:45 P.M.

This afternoon Lisa walked like a robot.

What is new: if she starts talking she talks and talks,
then she stares at a spot;

She also tries to push buttons on me (what she never
did before). She says I am her and she is controlling
my body. She kissed me on my ~~mouth~~ mouth.

Once I let her sit outside for 5 minutes. Then she
kissed me twice on my face and stared at me.

Later she said how wonderful my skin is.

As I had my TR's in she stopped doing it.

In the evening she started staring in the light.

I got her to eat a tuna sandwich, she also drank
2 cups of calmag and took all vitamins.

While I was writing this outside she came outside.

When I brought her in, she took my arm and put it
on her tummy and went with her tongue over my

face. I brought her back to bed.

She jumped up again and while I am writing

this she is standing next to me; talking

non sequiter things.

F80 00158

- She wanted to call her Minister. He has No 10.
- She called me Man when she awake this afternoon.
- She wants to go to a party.
- She has a date with her mother at the pool.
- She told me about the bits of her mother and picking in my breast while she was doing it.
- She told me again that her mother made her to take a mepp with her every day after lunch and then she sneaked away. Out of controll.

RE LISA MCPEARSON
1:50 P.M.

20-NOV 95

Lisa did not really sleep last night, but jumping out of her bed. Susan Reich had to get her lay down again and again.

Today she slept 1/2 hour. She is still ~~trying~~ trying to look in the light bulbs. "You have to follow the light, as light is live."

She doesn't talk that much as we do not talk with her.

She is counting with her fingers, pointing somewhere.

When I gave her a cup of water she through it on the ~~floor~~ floor. "Did this frighten you?" "No, I don't think so," she said.

3 times when Emma or me gave her a piece of banana she put it in a way in her mouth that she vomit it out.

Last night I made her drink 1 cup of calmag and to took 1 B₁, the 2nd cup and 2nd B₁ she vomitted out.

She has difficulties even to swallow a bit of water. She got 2 sep of protein drink down.

Right now she is again jumping out of the bed over and over.

FSO 00160

Lisa McPherson

Given 2gm MgCl₂ IM at 10³⁰ + 2-500mg Chloral Hydrate (capsule pierced and as much possible squirted into her mouth). She swallowed and fell asleep in the middle of a sentence. Respirate 18-24. Extremities still cool but not cold. S.DLV. needs relief now; I will stay until replacement comes.

Plan: ① Valerie or watch personnel w/ medical training for next 8 hrs.

② Need 5 2L fluids when awake and attempt to feed.

③ Call if any ?'s prob's.

Re: Lisa Mc Pherson -
(Addition to the morning report) .

Dear Sir,

Since 11:00 AM yesterday morning,
Lisa slept 3 hours during the day
(it was 3 times 1 hour) and as I wrote
earlier she did sleep 3 hours this last
night -

1 hour and half ago, she drunk a full
protein drink as well as took 300 mg
B1, minerals, B complex, 200 mg of
potassium - We then had her take a
bath as it has been successful yesterday
to have her sleep -

M Valérie .

MLO Report

29/11/95

11:30 AM

Lisa McPherson

Had about 3 hrs sleep last night.
The 'Watch' said she was quiet, but
suspects it's because she's weak, in
spite of protein drink, etc of yesterday.

Vitamins & protein drink being prepared
for her now.

Will be given Cal Mag, as well.

P.S.

P/MLO.

Knowledge Report

HASFSO

Swissair FSO

At 1:30am last nite HASFSO walked me out of bed. She rubbed me to wake up & acted very friendly. I was quite asphy as I have not slept well for days & was very tired as I start my day at 6:50am as I help weight train the class 12's each morning with out fail. She told me that I needed to go on watch for some fabric that flayed. She said that Suzanne Shurenbergh, MCO office mgr, was ordered to do it but refused. She told me Lynn Landry was waiting down stairs for me in the car then she walked away & looked outside said something & came back. I started to awaken & said this is not my hat & she said it wasn't hers & she was very sick & was to be in bed. I know this is true on being ill as I had given her an assist before & she's my roommate & I never see her come home on time except one. It's usually 3-4-5 am. She then told me I had to do this as Emma Schammerhorn ^{RAIC MLO} did this & Emma's in her 60's a 70's & was arg with her 2 nites. She said I needed to handle the SD member VP & they had sent some new EPT graduate over there who was left because the Type III was too much for her & I was a net & could handle it. She said Suzanne Shurenbergh would use the library as this was her hat. I refused again & again. She then proceeded to swear at me F this & F that & if an exec asked me to handle it would I say "no sir" to them. I tried to say that our eyes would never

demand this & she started swearing again at me. This
went on 25 minutes. I went on this watch as I had no sense
to contact with at 2 am. I went into the room & she was totally
Type III. Babbling, incoherent non stop. Seaking, no warm clothes
on - a bra top & shorts & shoes - no socks. She fell asleep for 4 hours &
got up. I finally chased her around the place 50 times & got on shorts &
tee shirt, jacket, socks & shoes - she was like an ~~animal~~ in cage.

She talked incoherently hour after hour. She refused to eat & spit out
everything she took. Her breathe was foul. She looked ill like

measles a chicken ^{on her face} pox¹. Had a fever to my touch. After 1 pm she
went violent & hit me a few times telling me in a rage she wants
to kill me #5 of times. I called in the "guard" outside - the fellow is

an HEO ~~staff member~~ - new one a Mexican gentleman. He stayed with me
during the rage - but she still smacked me around. (I did cover &
guard myself but she was out of control). I finally got her to

drink a protein shake but she wouldn't eat a sleep any further.

This lasted till 4 pm. There was no post coverage for my evening
& it was very busy ^{per Qual III}. In fact no one was R-factored till later per
the Qual III. I had no food, drink a sleep the whole time.

Now I'm not in uniform - can't get back to my room; starving -
have no \$ to get food; no key to my room & out of sorts
from the whole ordeal.

Love
John Gonzalez
Juraman FSO
