re: GPGDM GPGMD 302 OT 5

Dear Reggyx Dick:

This target called to go through the list of all the National Agencies for penetration and list out the priorities.

This I have done and written the priority number next to the agency and attached is a sheet of the agencies with their priority numbers as evidence.

The ones not marked are very low priorities next to the top 13 and when the major agencies are done then I will review additional data that has come in on the remainder of the agencies.

This is done and OK.

Love,

Cindy

LIST OF NAT'L AGENCIES WITHHOLDING FILES

The following are the nat'l government agencies that are withholding files and false reports, per the BI Gov't Pjt. In order to aid you in your evaluation of the priorities that should be given to each agency, I have noted beside each agency, how much that agency is withholding. The key is as follows:

- \* Means that they are withholding only a small amount of data, or that there is only a slim possibility that they are withholding a small amount. One star is also given to those agencies who are just withholding comm or data of ours, not false reports as far as we know.
- \*\* Means that they are withholding a medium amount - not a great deal, but definitely enough to be concerned about.
- \*\*\* Means that they are withholding a large amount - this would be a very heavy agency, with alot of data and false reports.

One thing I want to indicate regarding the consulates and embassies, is that they all come under the State Dept. As such, for most of the data I've indicated they are withholding, it was given to us by State. Any handlings for these groups could just be taken into account when looking at the State Dept, I would think.

Regarding the embassies, some locations on this list are indicated as having both a consulate and embassy. I don't know if this is possible, or just misduplication in the docs as to which it is.
