Dear Greg,

RE: Products from B1 US

Attached is a list of the vital products needed from B1 US. These are taken from CSG and GWW orders, and you at your end would have orders on these points already. These are, however, the products which need attention put on them more heavily at this time.

This would not interfere with current production being done by B1 at the moment. I'm thinking mainly of the ARM scene and the anti-cult legislation which is obviously top priority.

Some of the points on the attached ~~in~~ list of products are nearly done or possibly already done, in which case they ought to be wound up and gotten off the boards.

If you have any questions at all on this, don't hesitate to get a comm off to me and we can then sort out any bugs.

Love,

*Hermann*
