GUARDIAN PROGRAMME ORDER

GPgmo 283

24 Feb. 1976

Ref: GO 732

To Those Concerned

SECRET

~~SECRET~~ ~~CONFIDENTIAL~~

PROGRAM: SNOW WHITE HUNTER X

PROJECT: FOX

SUPERVISOR: INFO, <sup>sw</sup> PGMS BI US

OBSERVATION: GO 732 lays out the final step of the Snow White Pgms which will be the winning of full correction of false reports via the U.N.

Standard BI actions of penetrations and prediction on which way the U.N. will go will be needed for a full win on the Snow White Pgm.

PLAN: To penetrate the UN and establish lines for feedback data so that we can predict and handle anything that may stop the acceptance of our submissions to the UN.

MAJOR TARGET: To establish effective and safe lines of feedback within the U.N. so that any trouble with the submissions can be predicted and handled.

PRIMARY TARGETS:

1. BID Nat'l is responsible for the overall coordination and successful completion of this pjct.

BID Nat'l \_\_\_\_\_

2. Standard covert data collection and standard ops tech used. BID Nat'l is to ensure that all on the pjct are hatted as needed (not violating need to know); finances are obtained; and clean safe communication <sup>lines</sup> are established and maintained. ANY DATA ON W.W. CYCLES SENT IMMEDIATELY TO W.W. <sup>lines</sup> BID Nat'l \_\_\_\_\_

OK  
79/16

EX. 44

Pg 2

3. Nat'l BID BI US is to ensure that the project is debugged as needed and if the pjct is really bogged to get assistance from the Nat'l Dir Sec BI US.

Nat'l BID \_\_\_\_\_

VITAL TARGETS:

1. FSM(s) recruited by NY AG I with NE Sec ensuring the cycle is done. If FSM(s) not recruited within one month of receipt of this pjct. BID Nat'l to take whatever action needed ( project drawn up) to get FSM(s) for the penetration.

AG I NY \_\_\_\_\_  
NE SEC BI US \_\_\_\_\_  
BID NAT'L BI US \_\_\_\_\_

2. Full cover for FSM(s) worked out by AG I NY. Cover all the points of former Br L, <sup>Dir</sup> BI US write-up. All points that could trace FSM(s) to the Church handled in the cover. NE SEC to double check and approve or send back. BID Nat'l does final approval of the cover.

AG I NY \_\_\_\_\_  
NE SEC BI US \_\_\_\_\_  
BID NAT'L BI US \_\_\_\_\_

3. FSM(s) are not given any data on the pjct except need to know. They can start out thinking it is for research; and data given as it is needed by FSM(s).

AG I NY \_\_\_\_\_

4. BID to establish a good liasion line with legal and find out their plans re. the submission; target dates, how they will submit and where. This line kept in for the duration of the pjct.

BID NAT'L \_\_\_\_\_

5. Nothing is done on the p jct that can reflect back on the Church.

ALL ASSIGNED \_\_\_\_\_

6. At any point the p jct becomes bogged or more actions are needed BID to originate sub-projects and orders as needed.

BID NAT'L US \_\_\_\_\_

OPERATING TARGETS:

*Done*  
1. Go through the attachmants to GO 732 and list out the main areas of the U.N. that would handle our submissions.

BID Nat'l \_\_\_\_\_

2. Using the data in #1 above as a starting point do overt data collection locating the exact areas that will handle our submissions getting enough data to give a clear picture of exactly what is done and who does it re. our submissions. Liase with Snow White Legal terminal as needed for legal points that may come up.

BID Nat'l \_\_\_\_\_

3. From the research done draw up a complete flow chart of the exact route our submissions to the U.N. will take and the terminals (post functions) on the flow line.

BID Nat'l \_\_\_\_\_

4. From the data obtained in 1-3 write up an order to N.Y. AG I to do very thorough research on the possible jobs available at the U.N. The order should contain:

- a) The posts and job requiremants for the posts directly on the flow line of the submission.
- b) The posts and job requirements of any post available

at the U.N. starting with the ones closest to the flow line and working out. Include all janitor posts cleaning posts etc. Also any volunteer work that might be done.

5. AG I NY obtains and sends to BID Nat'l via the NE Dir Sec the data needed in #4 above. NE Dir Sec realizes the importance of the research and pushes and makes sure NY gets the data. Any heavy bugs reported to BID Nat'l for debug.

AG I NY \_\_\_\_\_  
NE DIR SEC \_\_\_\_\_  
BID NAT'L \_\_\_\_\_

6. AG I NY to use the research into the job qualifications to get the FSM placed. NE Sec ensures that this is done.

AG I NY \_\_\_\_\_  
NE SEC BI US \_\_\_\_\_

7. Any pjcts needed to get FSM in best possible position are originated by AG I NY and approved by BID Nat'l (via NE Sec).

AG I NY \_\_\_\_\_

8. After FSM(s) in place general data should be gotten on who will handle our submission; what the exact procedures are and general data on the area, and data as requested by BID Nat'l US.

AG I NY/FSM \_\_\_\_\_

9. FSM(s) kept in place until after our submission is made and additional pjcts for FSM utilization (getting prediction and handling data) are done by BID Nat'l.

AG I NY/FSM(s) \_\_\_\_\_  
BID NAT'L \_\_\_\_\_

PRODUCTION TARGETS:

1. FSM recruited and cleared by NY within one month of receipt of the pjct.

AG I NY \_\_\_\_\_  
NE SEC BI US \_\_\_\_\_

2. FSM in place within three months of receipt of this pjct.
